

HOLIDAY APPLICATION PACKAGE

The Holiday Application Package is a collection of eight interactive games and activities designed to celebrate the most important holidays and special occasions throughout the year. Each application has been created to engage children in shared activities, movement, and fun while capturing the unique spirit of each celebration. Colorful graphics, intuitive controls, and diverse gameplay mechanics make this package an excellent choice for schools, kindergartens, community centers, and special events.

VALENTINE'S DAY

A heartwarming and energetic motion-based game in which players catch heart-shaped soap bubbles floating across the screen. Every bubble collected increases the Love Meter, which continuously decreases over time. Players must act quickly and stay focused, as toxic green bubbles also appear among the colorful hearts and make reaching victory more challenging. The game develops reflexes, motor coordination, observation skills, and quick decision-making while providing plenty of fun.

WOMEN'S DAY, MOTHER'S DAY, TEACHER'S DAY

These are three unique applications created to celebrate important people and special occasions. Users interact with beautiful, picturesque floral arrangements that respond to touch and movement, creating a pleasant and relaxing experience. Each application features a unique collection of flowers and its own visual style, making every experience distinctive and memorable. The applications encourage shared celebration, foster aesthetic appreciation, and inspire users to express gratitude and good wishes in a creative and engaging way.

CHRISTMAS TIME

A warm and festive game available in both single-player and two-player (or team) modes. Various Christmas decorations, presents, sweets, and winter-themed items appear on the screen and must be collected before time runs out. In competitive mode, the player or team that gathers the most holiday items wins. The dynamic game-play promotes quick reflexes, concentration, and healthy competition while immersing players in the magical atmosphere of Christmas.

CHILDREN'S DAY

A colorful game filled with toys, sweets, and childhood fun. Various items appear on the game board and must be strategically combined. When two identical objects are merged, they create a new and larger item, with the goal of discovering increasingly exciting toys and surprises. Players must carefully plan their moves, anticipate outcomes, and manage the available space efficiently. The game encourages logical thinking, concentration, patience, and problem-solving skills while delivering a highly satisfying gameplay experience.

EASTER

An Easter-themed skill game set in a colorful spring meadow. The player's task is to collect all the Easter eggs into a basket before the clumsy Easter Bunny gets to them first. The bunny runs around the meadow accidentally breaking eggs along the way, so quick reactions and fast decision-making are essential. To save the Easter eggs, players must demonstrate strong reflexes, observation skills, and hand-eye coordination. This lighthearted and humorous game perfectly captures the joyful spirit of Easter.

HALLOWEEN

A thrilling skill-based game set in a fun and spooky Halloween world. Players must collect as many friendly ghosts as possible before the one-minute timer runs out. However, they need to stay alert, as black cats appear among the ghosts. Catching a cat costs one of the player's three lives, making every move count. The fast-paced gameplay develops reflexes, concentration, and observation skills, while the Halloween-themed visuals create an exciting atmosphere filled with fun and light-hearted suspense.

PIZZA DAY

A fun and fast-paced game in which players must protect a delicious pizza from an invasion of hungry flies. The insects constantly try to steal pieces of the pizza, and their numbers increase as the game progresses. Players must quickly chase the flies away before they manage to take the entire pizza. Featuring colorful picnic-inspired visuals and an Italian-themed atmosphere, the game offers a lighthearted and humorous experience. It helps develop reflexes, reaction speed, concentration, and hand-eye coordination.
